POPULATION LITERATURE

Vol. 1, No. 3 July 20, 1935

Subject Classification by Symbol

Aggregate population: enumerations, estimates of trend	A
Composition and characteristics: age, sex, race, social condition	C
Distribution: regional demography, migrations	D
Fertility and fecundity	F
Mortality and morbidity	M
Statistical methods	S
Theory, interpretation, policy	T

I. GENERAL

English (language)

Baker, John R., and J. B. S. Haldane. Biology in everyday life. London, George Allen and Unwin, Ltd., 1933. 123 p. 3s.6d.
Six radio broadcasts, including ones by Dr. Baker on the quality and quantity of mankind, and war, disease and death. ACMT

Berkson, Joseph. The construction of life tables and the use of the method for calculating survivals after operation. Proceedings of the Staff Meetings of the Mayo Clinic 9: 380-385. 1934. MS

Blacker, C. P. Fitness for marriage. The Eugenics Review 27 (1): 33-39. Apr. 1935.
An abstract of literature "to show what has been proposed by various writers and authorities." CT

Bogen, Emil. The cause of breast cancer. American Journal of Public Health 25: 245-250. Mar. 1935.
Comparative rates for various states and countries; relation to age and birth rate. M

Bolduan, Charles F. Hospital morbidity statistics. A practicable method of making them uniform and preparing them for analytic study. New York City, Department of Health, Reprint Series No. 5, Second Printing, 1934. 12 p. MS

Bonar, James. Daniel and Robert Malthus: a dialogue. Economic Journal (London) 176: 718-722. Dec. 1934. FT

Boudreau, Frank G. Health work of the League of Nations. Milbank Memorial Fund Quarterly 13: 1-22. 1935. MT

Bramwell, B. S. Wealth and ability: eugenics in the professions and crafts. Eugenics Review 25 (1): 23-26. Apr. 1935.

Bromhead, W. S. Fedritive movement's memorandum on white racial expansion. Rational Economic Federation, Ltd., 18 Ironmonger Lane, London, E. C. 2. 1934. D

Buchanan, Sir George S. The Milroy lectures on international cooperation in public health: its achievements and prospects. Delivered before the Royal College of Physicians and Surgeons of London, Feb. 27 and Mar. 1, 1934. Lancet, Apr. 28, May 5, May 12, 1934. 60 p. [of reprint] MT

Carleton, H. M., and H. J. Phelps. Birth control studies. 3. Experimental observations on the Grafenberg ring contraceptive methods. The Journal of Obstetrics and Gynaecology of the British Empire 40 (1). 1933. F

Carr-Saunders, A. M. Eugenics in the light of population trends. Eugenics Review 27 (1): 11-20. Apr. 1935.
The Galton Lecture, delivered before the Eugenics Society, Feb. 16, 1935. ACT

Collins, Selwyn D., and Elliott H. Pennell. The use of the logistic curve to represent the prevalence of defective vision among persons of specific ages above 30 years. Human Biology 7 (2): 257-266. May 1935. MS

Cox, Gladys. Clinical contraception. London, William Heinemann, 1933. 173 p. 7s. 6d. FT

Cox, I. W., and J. J. Walsh. What about sterilization? A series of eight articles discussing the question from the moral and scientific points of view. Washington, D. C. National Catholic Welfare Conference. 31 p. $0.15. CT

Crowley, R. H. The role of sterilization in the prevention of mental defect and disorder. Howard Journal 4, No. 1. 1934. CT

Cummins, Harold, and Morris Steggerda. Finger prints in a Dutch family series. American Journal of Physical Anthropology

(contd.)

20 (1): 19-41. Apr.-June 1935.
Finger print analyses of a series of 113 individuals "to be regarded as a racial sample in which the various finger print traits characteristic of the Dutch people may display altered frequencies as a result of its familial composition." A part of a project on the inheritance of finger print traits. C

Davis, Allison. The distribution of the blood-groups and its bearing upon the concept of race. The Sociological Review 27 (2): 183-200. Apr. 1935. CT

Dobzhansky, Theodosius. Are racial and specific characters non-Mendelian? Journal of Mammalogy 15: 1-3. 1934. C

Edge, P. Granville. Some observations touching genealogy of vital statistics. Malayan Medical Journal 9: 10. Mar. 1, 1934. FM

Elderton, W. P., and R. C. Fippard. Construction of mortality and sickness tables. 3rd Edition. London, A. and C. Black, 1935. 4s.6d. MS

Ellis, Havelock. Problem of sterlisation. New Statesman and Nation 8: 897-898. Dec. 15. 1934. CT

Engerrand, George C. The so-called Wends of Germany and their colonies in Texas and in Australia. The University of Texas Bulletin No. 3417, Bureau of Research in the Social Sciences Study No. 7. University Publications, University of Texas, Austin, 179 p. 1934. D

Fasten, Nathan. Principles of genetics and eugenics. A study of heredity and variation in plants, animals and man. Boston, Ginn and Co.. 1935. 407 p. $2.80. C

Fawcett, C. B. Population maps; with discussion. Geographical Journal 85: 142-159. Feb. 1935. D

Federal Council of the Churches of Christ in America. Committee on Marriage and the Home. Bibliography on education in family life, marriage, parenthood, and young people's relationships, prepared jointly by the Committee on Marriage and the Home of the Federal Council of Churches and the Joint Committee on Family and Parent Education of the International Council of Religious Education. Chicago, Ill., International Council of Religious Education; New York, Federal Council of Churches, 1935. 31 p. T

Fielding, Michael, pseud. Parenthood: design or accident? A manual of birth control. Preface by H. G. Wells. New York, The Vanguard Press, 1935. 239 p.
Contains list of birth control clinics in the United States. FT

Fisher, R. A. The amount of information supplied by records of families as a function of the linkage in the population studied. Annals of Eugenics 6 (1): 66-70. Oct. 1934. CS

----. The effect of methods of ascertainment upon the estimation of frequencies. Annals of Eugenics 6 (1): 13-25. Oct. 1934.
In human genetics. CS

----. The logic of inductive reference. Journal of the Royal Statistical Society 98 N.S. (1): 39-54. 1935.
Discussion by A. L. Bowley, Dr. Isserlis, Dr. Irwin, Professor Wolf, Dr. E. S. Pearson, Professor Greenwood, Dr. Harold Jeffreys, Mr. M. S. Bartlett, Dr. Jerzy Neyman, p. 55-76. Reply by R. A. Fisher, p. 76-82.

----. The use of simultaneous estimation in the evaluation of linkage. Annals of Eugenics 6 (1): 71-76. Oct. 1934. CS

Pennsylvania. State Planning Board. Preliminary report, Pennsylvania State Planning Board to the Honorable Gifford Pinchot, Governor of the Commonwealth, and to the National Resources Board. Harrisburg, Pa., 1934. 682 p.
"The section on population discusses the population prospect for Pennsylvania, bringing out the trend towards a stable population.

...The future population estimates are those of Thompson and Whelpton of the Scripps Foundation...There is a discussion of the movement of population within the state from a study of population redistribution by C. W. Thornthwaite. The net migration by counties, 1910-1920 and 1920-1930, is shown. There is also an interesting report of a study on the movement of population within the state since the 1930 census was taken. This study is based on a census of cities and boroughs having a population of 25,000 or more and the school census for the whole state. The census of the cities was a C.W.A. Project." Agricultural Economics Literature 9 (4): 220-221. Apr. 1935. AD

"To what extent does the existing machinery of social selection adjust educational opportunity to individual ability?" Otis Group Advanced Test, Form A, was given to samples of nearly 100 public elementary groups and to approximately 1/3 of the secondary schools in London (over 10,000

individuals). "Taking children of equally high ability, seven fee-paying pupils will receive higher education for every one free pupil...At a very high level of ability [1 per 1000 in the general school population] two-thirds of the total originate in elementary schools, of whom 70 per cent are of wage-earning parents". Subsequent papers will analyze the role of parental occupation and fertility in the selective process. CT

Methorst, H. W. Differential fertility in the Netherlands. Population, Vol. I, Special Memoir. Apr. 1935. 70 p. 2S.6d.
An analysis of the number of births and the death rate among children of all marriages contracted in the years 1907-1911, and not being dissolved prior to 1928, in order to discover the changes which had taken place since the investigation of the Central Commission

of Statistics during the years 1897-1900. Questionnaires were filled out from the population registers in four cities (Amsterdam, Rotterdam, Utrecht, and Dordrecht) and 103 other communities with populations of 4000-10,000. The value of house rent was taken as an index of prosperity, and births and deaths of children in the various "prosperity classes" related to age of husband and wife at marriage, and residence in town or rural districts. Number of children born, deaths at less than 5 years of age, and time interval between marriage and the first and fourth live births are contrasted in the various prosperity classes. Fertility and mortality are analyzed according to mother's religion, presence or absence of mixed marriages (religious), father's occupation. Interval between marriage and first live birth is analyzed according to mother's religion. Fertility according to occupation of husband is also analyzed from 1930 census data. F

The Population Association of America was organized in 1931, under the leadership of Henry Pratt Fairchild, who served as President 1931-1935. "The object of this Association shall be research in respect to problems connected with human population, in both its quantitative and qualitative aspects, and dissemination of the results of such research." (Constitution, Article 1, adopted May 22, 1932.)

The Association has outlined the field of population research. The Research Committee of the Association, in cooperation with the Secretary, is now undertaking a critical survey of population studies with reference to adequacy of basic data, present trends, and research needs. A Committee on Education is being formed to investigate the place of population studies in educational programs. The Association has standardized the use of the terms, "fecundity" and "fertility" (limiting the reference of "fecundity" to "physiological capacity to participate in reproduction"). The Committee on Divorce Statistics is preparing a report on methods of estimating proportional frequencies of divorce.

The Population Association of America is represented in the International Union (International Union for the Scientific Investigation of Population Problems) through its Research Committee. The Association has sponsored sessions on population problems, the largest being the "Conference on Population Studies in Relation to Social Planning," Washington, D. C., May 2-4, 1935. (See papers in Social Forces, October, 1935; also rotaprinted report on "Population Redistribution.")

The Population Association is now publishing a quarterly bibliography of current books and articles, Population Literature. The Association also supplies its members with current numbers of Population, published from time to time by the International Union, and with miscellaneous notices and reprints. The membership list is also honored by several public and private organizations publishing materials on population problems.

All persons interested in population problems are eligible for membership. The dues are three dollars ($3.00) per year. Organizations are not so eligible, but libraries subscribing to Population Literature (annual rate: $3.00) also receive other literature, including Population, without additional charge. Applications for membership, with statement of organizational affiliation and special interests, and subscriptions to Population Literature may be sent to the address given below. Orders accompanying applications or subscriptions may be drawn to Population Association of America. Suggestions regarding population studies or requests for information may also be sent to this office.
